China agriculture encounters and achieves persistently develop, push and robust from 2024 to 2025, and achieve sustainable perfect, reshape and remold from closing years. China agriculture develop is a new start point of China agriculture, is China agriculture develop's new orientation, new protect, and new orientation.

Keywords: China agriculture develop, new orientation, text research

China agriculture encounters and achieves persistently develop, push and robust from 2024 to 2025, and achieve sustainable perfect, reshape and remold from closing years. China agriculture achieve develop under the guidance and lead of Xi jin ping and Li keqiang and Liqiang and achieve robust from period of Hu jintao and Wenjiabao, and achieve reverse and change under circumstances of new phase and new era. In year of 2024, china agriculture achieves persistently promote and generation of food achieve prominent increase and prominent perfect, produce of rice and powder achieve persistently increase, produce of food and water achieve persistently enhance. Produce of food achieve historical enhance and create historical new high again from perspective of following governance and following administration. Power and resource achieve stable supply, important industry chain achieve enhance of ability of self-main and controllerable. Out of poverty and penetrate hard achieve prominent fruits, and rural dweller's income of poor area persistently increase, agricultural education and agriculture reform and agriculture develop persistently push, agriculture medical care and agriculture guarantee persistently perfect. In the following year, government emphasize seizing work of agriculture, rural and peasant, and pushing agriculture's flourish, and insisting prior develop of agricultural and rural, learn and practice experience of western agriculture develop. Promote agriculture products stablize produce and guarantee supply.

China Agriculture Develop: A New Start Point

In new phase of China agriculture develop, we encounter important strategic opportunity period, and achieve agriculture develop's new increase, and agriculture construct new push. On the basis of new phase, we encounter agriculture develop new era, and face agriculture develop new challenge, and have ability to explore agriculture develop new trail. In 2024, we start a new beginning of agriculture develop and achieve agriculture develop's sustainable push, and agriculture industry's sustainable enhance. On the basis of coming year's strive, peasant persistently achieve income's increase and persistently perfect living environment, and persistently

achieve agriculture's produce's innovate. On the basis of existing fruits, peasants strive to accomplish agriculture produce task, and strive to expand its income scope and income origin, and strive to perfect their produce and living environment. Rural area's construct persistently perfect and rural area produce and living persistently enhance, rural area's ecological system persistently perfect, infrastructure construct persistently innovate, and total status of this area persistently perfect. Agriculture industry of China persistently innovate and industry expand and industry chain's connect persistently promote, and relation of agriculture industry and second industry and third industry persistently promote, and basic status of agriculture industry persistently enhance. Problem of farming persistently be resolved and agriculture transform and change persistently promote.

Year of 2024 is government governance transformation and reform's vital year, and institute's change, connect of mechanism, and system's enhance constitute China government's new sphere and new situation. Governance transform means governance method and governance manner's change, and means association of little government and big society and network governance and collaborative governance and governance's manner's persistently change. This sort of transformation solve china government governance traditional problem, and out of strange circle of government governance and explore new trail of China governance. On the basis of this transformation, China agriculture achieve persistently change, and achieve transformation from traditional tough farming to modern concentrate plant, transformation from flooding mode to river mode, and transform from center produce to beyond produce. From text of 2024 government report, we can find totality and association of agriculture develop and flourish of country side and rural area and agriculture's persistently push and innovate. Anchor agriculture strong nation construct, and learn agriculture develop experience, differentiate different area and take measures according to realistic sorts, progress gradually, and insist from beginning to the end and push rural flourish's essential progress and achieve phase fruit of this success and coherence. Reinforce rice and important agriculture products' produce and supply, and stable wide spread scope, and consolidate expansion fruit of bean and push large scale enhance of unit produce. China government strive to increase purchase price of food and water, and take the policy of cost and income guarantee, and strive to comprehend protect mechanism of peasant benefit. Support rice plant and perfect compensate mechanism of main produce area (Li, 2024, p. 28).

Report emphasize that agriculture must put the emphasis on oil produce and must expand oil produce and stable all sorts of industrial produce ability, and develop modern infrastructure agriculture and support save water agriculture and no water agriculture develop, and reinforce illness manipulation of insect and animal, and reflourish seed industry, and agriculture core technique research, promote agriculture machine equipment develop, insist farming activity, and perfect farmland occupy and compensate institute. Report emphasize that people must insist fruits of out of poverty and penetrate the tough and must insist return to poverty monitor, and help and associate work, and must ensure that people can avoid return to poverty with scale. Report emphasize that people must stably push rural area reform and deepen rural farmland institute reform, and start sponsorship of farm land and deepen collective ownership and promote peasants' income increase.

Collaborative and Melting of City and Rural: A New Trail of China Agriculture Develop

Paramount leader of China Xi Jinping emphasize that city and rural melting develop is necessary requirement of China modernization and must coherence new industrialization, new urbanization, and rural

flourish. Comprehensive enhance city and rural plan, construct, governances' melting level, and promote factors of rural and city achieve exchange and promote city and rural common develop. People must comprehensive push new urbanization institute and mechanism develop and must insist common develop of rural and city (Xi, 2024, p. 22). Collaborative and melting of city and rural means that city and rural can connect and collaborate with each other, and can promote every unit robust and push every unit enhance, and can drive city's and agriculture's develop. Collaborative and melting of city and rural can firstly display as collaborative of agriculture in different site, and can be regarded as communication and collaboration of basic industry. Xi Jinping emphasize that collaborative and melting of city and rural put the emphasis on meeting of necessary requirement of China modernization, and meeting of requirement of China modernization requires that industry must melt with each other, and basic industry must help each other and promote each other. These help and promote promote achievement of China modernization and promote collaborative and melting of city and rural. New industrialization, new urbanization, and rural flourish reflect requirement of industry enhance, and requirement of urbanization enhance, and further develop of rural area, and reflect industry transformation orientation, urbanization transformation orientation, and rural transformation orientation.

Collaborative and melting of city and rural can be achieved in following trails: firstly, promote stuff out flow and in flow, and promote stuff hard flow and soft follow, and promote stuff flow connect with city construct and rural construct, stuff flow can promote city further develop and promote rural area further develop. Stuff flow must penetrate with city develop and rural develop and must spur city further construct and rural further construct, drive city's flourish and rural flourish. Secondly, organization in city and rural must connect with each other, and organization in different site must insist keeping common objective and keeping common orientation, and these connect of organization can promote city's connect with rural and promote city rapid develop with rural and rural rapid construct with city. Thirdly, industrial collaboration must be conducted and industrial melt must be insisted, so that industry indifferent site can connect and melt with each other, and associate with different site develop. Fourthly, collaborative and melting of city and rural must insist connecting of different site's mechanism and connecting of different site's institute. Mechanism and institute's connect can promote city and rural's further develop, can promote city and rural's deeper construct.

Technique Inflow and Outflow: China Agriculture Develop New Orientation

Technique inflow and outflow means that new technology's widespread and absorb, and new technology's communication and delivery, and technique can reflect people's essential power and people's subjective pursuits, and people's spirit and value. Technique inflow means communication with foreign's strive, delivery with foreign strive, and means new technology's flood in and technology's market's further occupation. Technique outflow means that new technology persistently flooding out and occupy foreign market and take social intercourse with foreigners. Technique outflow always accompany with technique's inflow and means technique's expansion and technique's widespread, and reflect technique's new progress and new advance.

Technique inflow and outflow is core part of China agriculture develop, is key unit of China agriculture develop. Technique inflow and outflow is communication and delivery of different sides and express of different civilization and technology widespread and broadcast, technology innovate and create. Technique inflow and outflow blaze a new trail for China agriculture develop and put the emphasis on technique enhance and technique

increase, scrutinize technique's develop orientation and develop drive. China agriculture develop can achieve further penetrate via technique inflow and technique outflow, China agriculture develop can achieve transformation via technique inflow, and can achieve further advance via technique outflow. China agriculture technique both include farm and water technique, and include transformate and fostering technique, all these techniques can be deemed as nudging power of China agriculture develop.

Technique increase is supporting power of technique inflow, technique increase display a sort of increase under guidance of technique and display increase manner under guidance of technique. Technique increase means technique accumulation, technique concentration, and technique collective, and reflect technique advance and technique probe and technique leap. Technique increase becomes important drive of technique inflow, and becomes origin of technique inflow. Technique increase can deduce technique outflow and technique increase can be deduced to technique growth, technique expand, technique transformation. Thus, technique increase can result in technique outflow. Therefore, technique increase can push technique inflow and outflow and can be used to push China agriculture develop, and promote China agriculture achieve further exploration.

Policy Transformation: China Agriculture Develop's New Protect

Policy is an important part of law, an important part of institute, and policy can reflect people's public intention, and public purpose, and reflect people's public behaviour and public administration, and public notion. China's economic policy emphasize economic should persistently health develop, and must deem scientific develop as economic develop's theme, and as core part of economic develop manner transform (Compiler of Mao zedong thoughts and socialist theoretical system with Chinese characteristics, 2023). China economic policy display China's economic develop emphasis and orientation and display economic develop trail and objective, under the guidance of economic policy, people emphasize agriculture develop must insist orientation of health and rapid, and must insist agriculture's basic status and agriculture's direct effect. Economic policy of China emphasize endeavour of achieving transformation of economic from tough to concentrate and from resource utilizing and resource taking to resource concentration and environment friend. Under the guidance of this policy, China agriculture strive to achieve tough develop transforming to concentrate develop, waste develop transforming to save develop. Policy transformation will promote China agriculture achieve develop manner and develop trail's change and promote China agriculture achieve transformation from lower to upper.

Policy transform reflect people's economic notion's change, economic drive's change, and economic power's change, economic notion more emphasize share, green, open-up and so on, and more emphasize market drive, capital drive, and benefit drive, and more emphasize new power utilize, new power develop and new power exploration. Policy transform put the emphasis on agriculture's share develop, travel develop, green develop, and open develop, and achieve agriculture's persistent increase, effective increase, and gradually increase, and achieve agriculture's health develop, civilized develop, harmonious develop.

Policy transformation provide China agriculture for protect and guarantee, and provide a safe guard for agriculture and relevant industry, and a safeguard for agriculture produce, and agriculture develop. Policy transformation can promote institute and mechanism change and promote system and scheme change. This sort of transformation provide protect for China agriculture develop (Li, 2025, p. 30).

Institute Realignment: China Agriculture Develop's New Orientation

Institute realignment emphasize institute must achieve transformation and leap, and must change from old institute to new institute, and must change from factor transformation to system transformation. Institute realignment emphasize institute factor's reconstitute, and institute factor's redisplay. Institute realignment emphasize institute factors' rearrange and reconstitute is important factor of institute realignment, is important factor of pushing institute innovate, and factor rearrange and reconstitute is institute realignment's important tool and method. China agriculture institute emphasize people must push agriculture premise develop and agriculture infrastructure construct, and must put the emphasis on agriculture premise innovate and agriculture infrastructure enhance. Report emphasize that institute must ensure agriculture environment perfect, agriculture living innovate and agriculture produce labor enhance. Institute must ensure agriculture mechanism innovate and agriculture mechanism develop. Report emphasize that people must push urban and suburb collaborative develop, promote city and rural common develop, promote city agriculture and rural agriculture common advance, promote travel agriculture and pick agriculture associate develop, promote green agriculture and cooperation agriculture common develop. New agriculture institute construct is important guarantee of agriculture develop, new agriculture institute construct emphasize people must promote agriculture develop and rural develop associate push, and must ensure peasant and agriculture produce associate develop. Institute realignment can provide institute guarantee for agriculture develop and promote agriculture further develop and further exploration. Institute realignment put the emphasis on old institute reshape, and new institute fostering and maturing, and must ensure old institute and new institute connect, and new institute 's replace to old institute, so that agriculture 's institute can develop smoothly and stably, and must be corresponding to agriculture institute develop law.

Conclusion: China Agriculture New Institute Realignment and New Institute Develop

China agriculture new institute realignment and new institute develop emphasize agriculture institute reshape and reconstitute, emphasize agriculture mechanism realignment and agriculture mechanism innovate. Agriculture institute realignment and institute develop emphasize citizen participation and citizen vote and institute realignment must insist regulation of learning from citizen, and learning from citizen discussion. China agriculture new institute realignment and new institute develop must insist dominance of government, government emphasize seizing work of agriculture, rural and peasant, and pushing agriculture's flourish, and insisting prior develop of agricultural and rural, learn and practice experience of western agriculture develop. Dominance of government can promote agriculture new institute realignment and new institute develop.
