Explanation and calculations

CREDIT HOURS : Credit Hours for a course indicate weightage for that course for calculation G. P. A.
COMBINED GRADE AND ACTUAL : The Combined Grade in a course is derived by using weighted mean formula the weightage between Sessional, Practical, Semester Final Examination being 40 : 15 : 45, 40 (for Sessional) : 60

GRADE POINT : (For Semester Final) in case of non practical courses, Respective Grade point are multiplied by the weightage and the sum divided by 100, to give the actual Grade point for the course. (The figure is calculated to 2nd place of decimal). For conversion back to letter Grade the following table is used.

G. P. A. : 0-0.99 (F) : 1.00-1.49 (D) : 1.50-2.49 (C) : 2.50-3.49 (B) : 3.50-4.49 (A) : 4.50 or above (E).
(The 'Grade point Average' for a semester is obtained by adding the Products of actual Grade Points and relative Weightages for different courses and dividing the total by the total credit hours for the semester.

O. G. P. A. : Stands for overall Grade Point Average for all semester up to and including the last specified semester.

Requirements for passing etc.

For passing 'a semester' the candidate should have obtained in each paper at least grade D (100 point) at the final exam & also a combined Grade D (100 point) and the semester GPA shall not fall below 2.2 for B. Tech and 2.50 for M.Sc. Tech/M. Tech/ M. Phil Programmes.

An OGPA of 4.00 and above shall be equivalent to pass in First Class with Distinction, an OGPA of 3.50-3.99 equivalent to pass in First Class and an OGPA of 2.20-3.49 equivalent to pass in Second Class.

Equivalence of G. P. A. to Percentage

Grade Point Average on 5-point scale awarded by the Indian School of Mines to its students for different examinations has no equivalence to percentage of marks.

However, where necessary, the School treats G.P.A. / O.G.P.A. of 3.00 out of 5.00 as equivalent to 60% marks.
